

ANNOUNCEMENT OF MTS SOLUTIONS DIVISION

MTS Engineers Pvt. Ltd, since 2003 a real process and analytical instrumentation solutions provider working for one of the world renowned Innovators in process flow, level, moisture, humidity, pressure & temperature measurement & analytical parameters such as pH, conductivity, turbidity, TSS, free chlorine, biofilm, particle counter, streaming current, UV254-BOD/COD, Oil-in-Water(VOC), Total Trihalo-methane (TTHM), Ammonia for water and wastewater applications. With **CUMULATIVE EXPERIENCE** of independent Sales and After sales service we provide **SOUND ADVICE** and delivers **CONCRETE RESULTS**.

Looking into company's growth perspective we announce a new division "**MTS SOLUTIONS**" handled by Mr. Sameer Amin with background of Electronic & communication having more than 20 years of real experience & founder of **M/s. Integrated Automation Co.** in executing various process & plant automation projects. **MTS SOLUTIONS** division will be engaged in providing customized solutions as per customer's application in various process industries, mainly as below:

- **Chemical & Fine-chemical**
- **Water & Wastewater Treatment Plants**
- **Defence Research & Allied Industries**

Primary focus areas will be below:

- **Water Infrastructure Automation**
- **Research Process Automation**

Our Scope:

- 1) Application Study
- 2) Hard ware selection (Process Instruments & Automation)
- 3) Software development (PLC, HMI, IIOT)
- 4) Control Panel Manufacturing
- 5) Testing & Commissioning of the panel

Type of Automations:

- 1) AC / DC drives for speed control of motors
- 2) Sequential operations by PLC + HMI+SCADA

- 3) Process control by use of PLC+ HMI+SCADA
- 4) Process calculations by use of PLC+ HMI+SCADA
- 5) Man machine interface / operator control using display & key pads.
- 6) Connectivity to host computers
- 7) Accurate speed and positioning controls with Servo Drives and Motors
- 8) IIOT solutions

Due to industries expectation on improving productivity, process efficiency, preventive maintenance & report generation & analysis, MTS Solutions division involved in developing skills for Industry 4.0 automation as well. We are open to discuss your needs in this domain.
